OVERVIEW

In his first season, longtime NBA assistant Kevin Young has led BYU to a 11-5 start. Some of their notable wins have come against #58 Arizona St (76-56) and #90 N.C. State (72-61), but they have struggled mightily vs #3 Houston (55-86) and #73 Providence (64-83). Their other losses have come against #23 Mississippi and #18 Texas Tech. They're currently #43 in KenPom.

There's an excellent combination of proven returners and some very solid newcomers, even though with less collegiate experience than normal. Egor Demin is a FR from Russia who's handling the bulk of the playmaking duties but doing so effectively while also scoring the ball and defending at a high level. Their offense starts and stops with him. Dallin Hall has a similar skillset to Demin but is more passing oriented and mostly prefers 3s as a scorer. Richie Saunders is a true 3 level, efficient scorer within their offense. Kanon Catchings is aggressive from 3 and impactful on defense (3&D profile). Keba Keita and Fousseyni Traore serve the same function for this team. They crash the glass, finish at the rim at a high level and are both very active on D. Traore does a little more passing, but they're both very impactful. Off the bench Trevin Knell and Dawson Baker are returners (Baker played just 4 games last year, but was all-conference at UC-Irvine) who want to impact the game from 3 — Baker was a little more active inside the arc. Mag is a dynamic forward from Rutgers and Mihal Boskovic is a backup FR big looking to shoot 3s.

BYU is off to a top-25 start offensively. They are taking an NBA approach by playing fast and taking a bunch of 3s (and not a lot of non-rim 2s). While they're shooting well on all 3 levels, their offense has been really superior due to excellent ball control and solid offensive rebounding. They are almost always scoring each time down the floor in one way or another. Their only struggles offensively have been some poor shooting at the FT line, and perhaps an overreliance on jumpers at times.

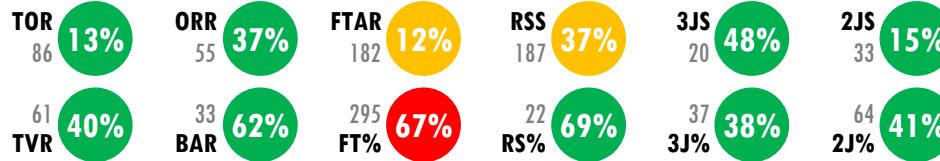

Their defense has not been as sharp ranking just inside the top-90 nationally. They've been tremendous about controlling the defensive glass (#2) and forcing a fair number of turnovers. They've been excellent about protecting the rim (including blocking shots) and forcing tough 2s in the process. Teams have been able to take advantage of them from 3pt territory though. However, given their ability to maximize possessions offensively and minimize them defensively, they've been a tough out overall.

BYU's pace is very up tempo after defensive rebounds and deadballs (quick hitters) so we must engage our pressure quickly to slow them down. Overall, they are a solidly efficient offensive team no matter how the possession starts and are ELITE after deadballs — know what they run and lock in!

BYU's halfcourt offense is among the top-30 in the nation this season. They do a fantastic job with their ball security and rank top-12 in the nation in 3PT volume. Their very strong ability to finish at the rim is what makes them standout and we must be aware of their ability to attack the offensive glass, especially after 3PT misses. One area where BYU struggles offensively is free-throws, where they rank towards the bottom of the NCAA. The primary goal here is going to be limiting damage on the barrage of 3s they'll take and not give them any second chances!

Transition Offense COMPARISON

1.12

Adjusted Points
Per Possession

Their transition offense has been below the Power 4 average this season. They struggle immensely at the free-throw in terms of volume and efficiency. BYU also turns the ball over at a high rate so we must have active hands in transition and continue this trend. Their rim finishing has been subpar on average volume. We must be prepared to box-out and grab defensive rebounds, especially after their mid-range misses. One thing BYU thrives on in transition is their 3PT shot, where they have been above-average in both efficiency and volume – it starts here!

FULL SEASON				+0.14												

Offensive Trends

BYU has been great on this end all year, but have fallen from the number 12 offense in their first 6 games to the number 82 offense in their most recent 5.

Their shot selection efficiency has seen improvements. They've gone from 263rd in rim volume to 39th; and from 89th (lowest) in midrange volume to 8th. Incredible jumps here. They have also recently seen a significant improvement in their offensive rebounding.

Ball distribution has remained a key strength; while turnovers and getting to the free-throw line still remain a weakness.

Adjusted Transition
Volume Rate

BYU does a moderately good job of keeping their opponents out of transition. In fact, opposing teams are playing very slow following deadballs and somewhat slow after made baskets and steals indicating how well BYU can set their defense following their offensive actions. Efficiency-wise, BYU's defense is ELITE after allowing offensive rebounds and fairly above-average following their own made and missed baskets.

Adjusted Points
Per Possession

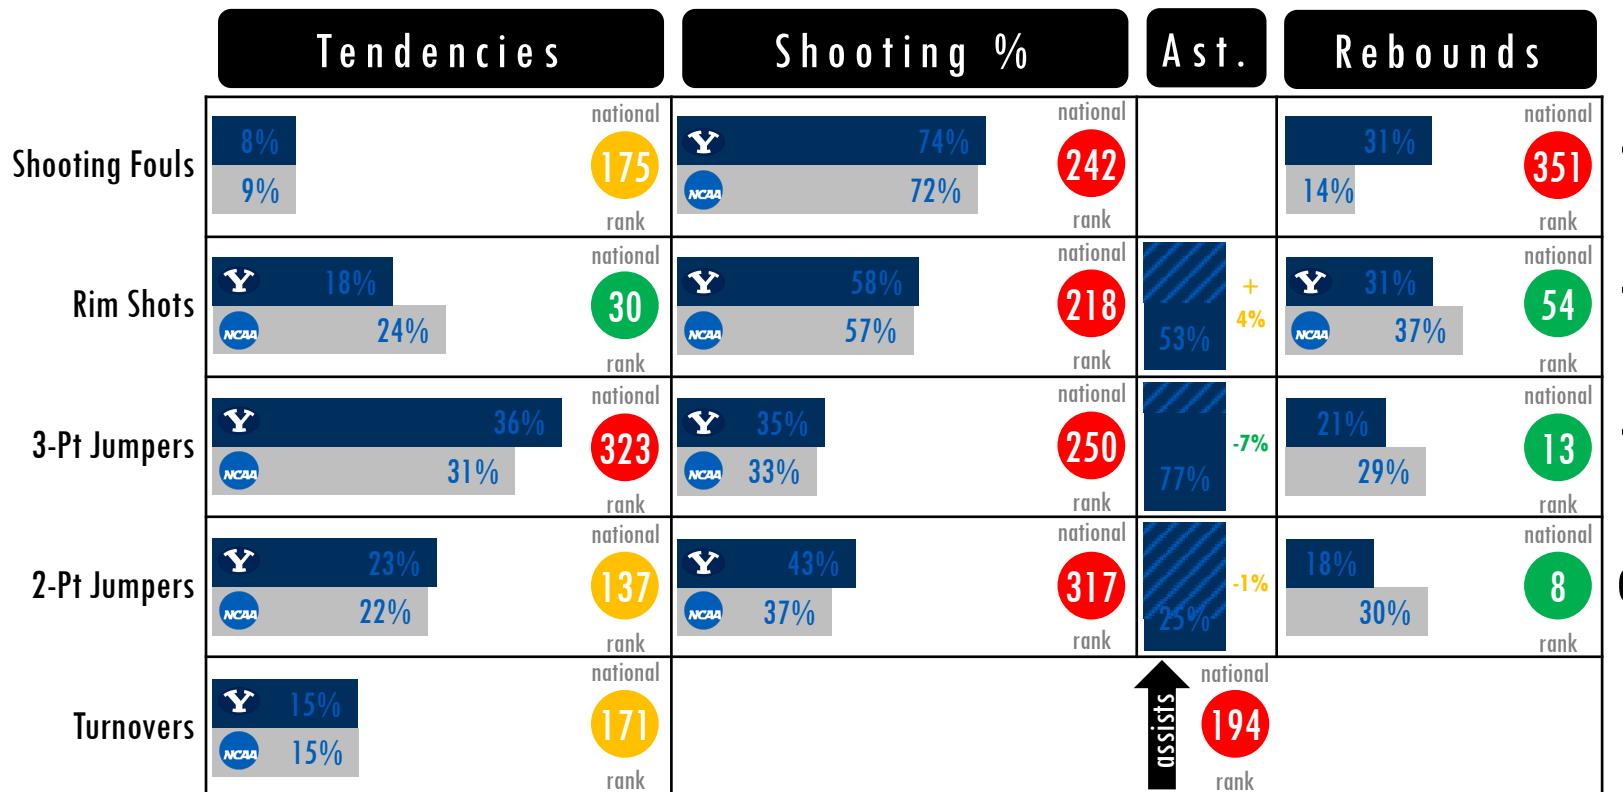

Halfcourt Defense COMPARISON

1.02

Adjusted Points
Per Possession

BYU's halfcourt defense is below average for Power 4 standards (183rd in adj. D-efficiency). Keeping teams away from the rim and defensive rebounding is a key part of their defensive success. Their opponents have been very efficient in their shot making on all shot types. Specifically, BYU is very vulnerable from 3 allowing high efficiency on an extremely high volume of shots.

Transition Defense COMPARISON

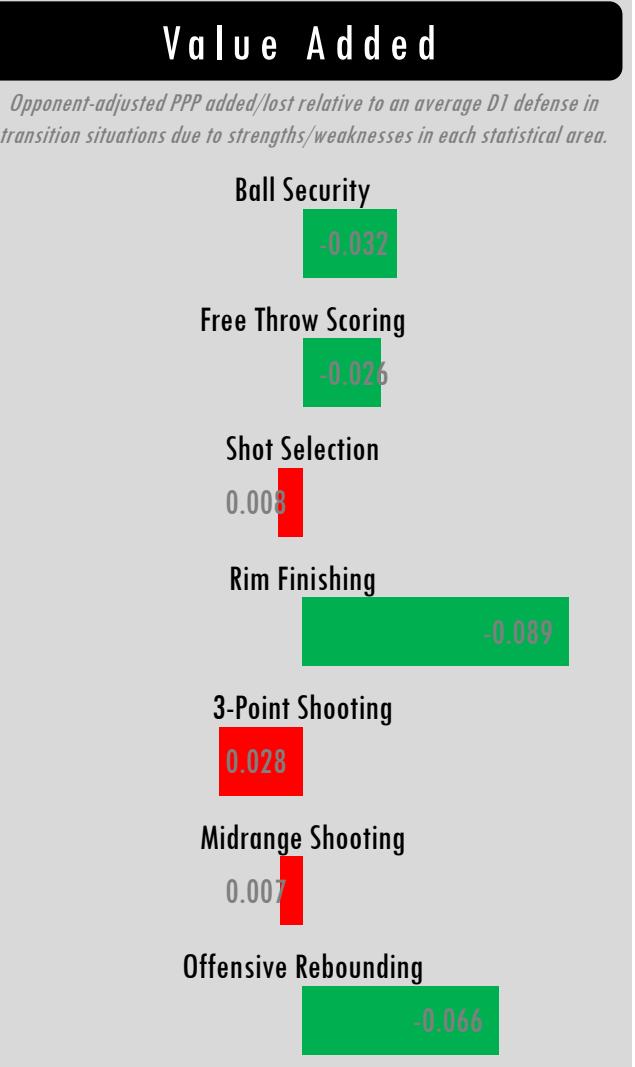

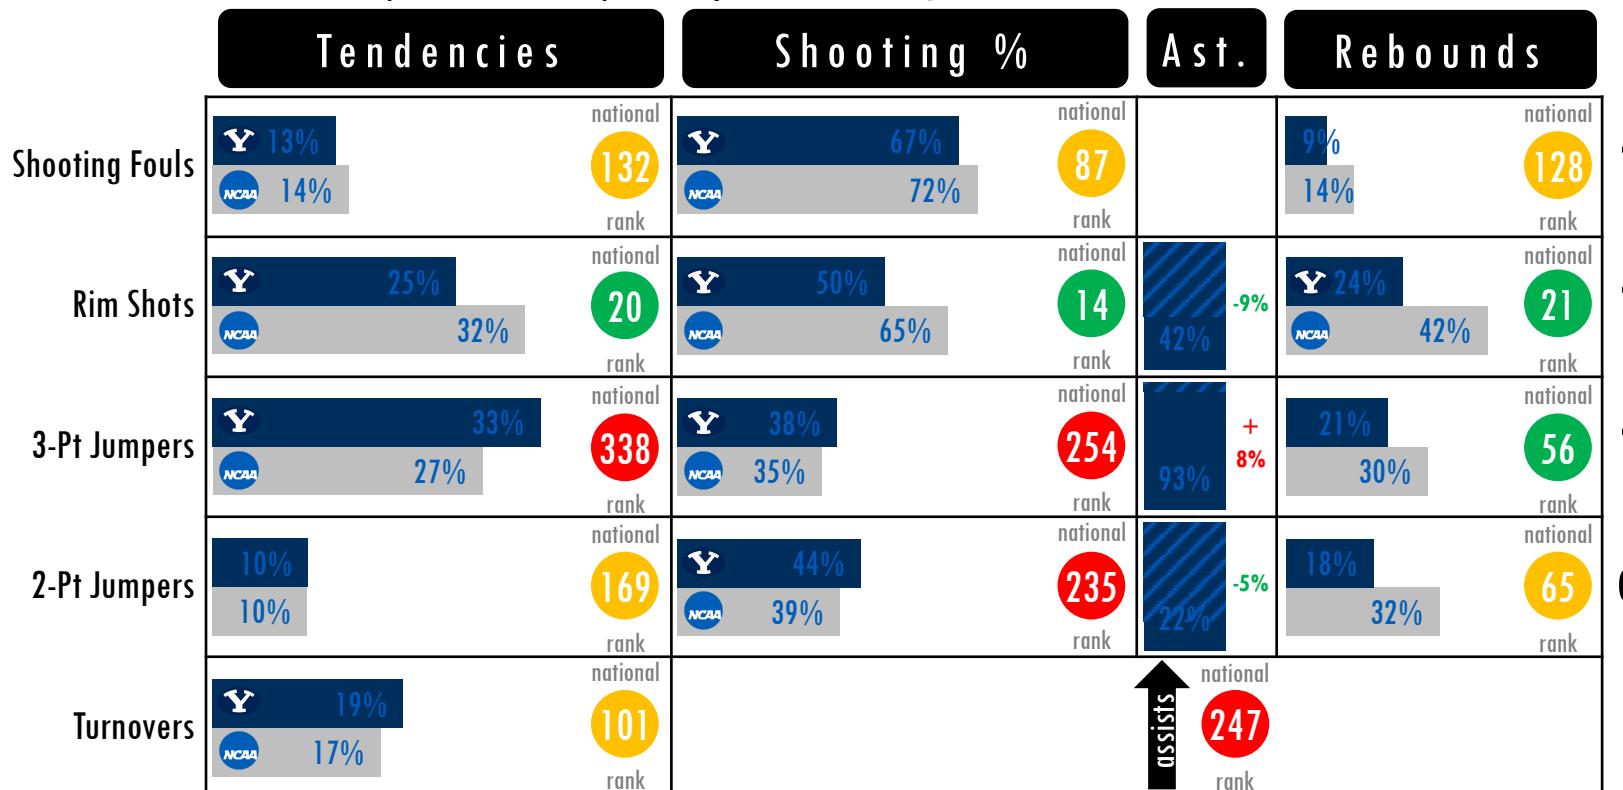

1.12

Adjusted Points
Per Possession

BYU has been great in transition defense (#35 in the nation). Their ability to limit rim volume and efficiency is what makes them stand out. They also do an extremely good job grabbing defensive rebounds, especially after rim-shots 3PT misses. BYU does allow an extremely high number and efficiency of 3-pointers and struggles defending the mid-range.

Lets be ready to knock down our shots!

Lastly, note that they are capable of forcing TO's in transition, so take care of it!

Dec 14

Dec 20

Dec 31

When BYU has defended at their best, they are generally clicking on all cylinders. The thing that really stands out that is not always a consistent factor for them was how often they forced turnovers in a lot of the games below. In addition, opponents missing the high volume of 3s BYU allows is another key factor.

Defensive Trends

BYU's defense has worsened the deeper they've progressed into the season. BYU's defense has gone from the #69 unit in the first part of the season to a D-efficiency ranking 171 over the past 5 games.

Notably, opponents have opted for fewer midrange in general – take the 3s. On top of this, opponent shot making improved inside the arc and teams have been able to crash the offensive glass very well against them.

Opponent-Adjusted Stats By Season Segment (value above/below D1 average)

Egor Demin

6'9" 1st

*Swiss army knife. Efficient overall on VERY high usage.
Terrific Passer. Effective 3pt and rim scorer! Disruptive
defender!*

Updated HDI
Player Rating
86

OFFENSE

- Efficient overall on VERY high usage. BYU has been much stronger on the offensive end with him on the court.
- EXCELLENT passer for his size/role, one of the best in the country in all situations!
 - Reasonable turnover rate — also very impressive for his role.
- Good shot selection; mostly 3's and layups.
 - $\frac{1}{2}$ of his shots are from 3 — 30% 3J%. BYU will go to him on inbounds plays — know where he is on BLOB/SLOBs. Contest all shots!
 - Efficient finisher around the basket when he has a good look. Driver; average volume and more aggressive in transition.
- Adept at getting to the FT line with subpar efficiency.
- Not an offensive rebounder.

DEFENSE

- Potential block and steal threat.
- Reliable D-rebounder.

SCORER! VERY efficient on fairly high usage. Dangerous 3pt shooter on high volume. Good rim finisher too. Active defender.

Updated HDI
Player Rating
84

OFFENSE

- **VERY efficient on fairly high usage. Leading scorer!**
- About $\frac{1}{2}$ of his shots are from 3 and making 45%! Seeking shots off the catch in both transition and the halfcourt. Also a factor on their inbounds. Must contest all shots!
- Very good rim finisher on moderate volume in the halfcourt. More eager in transition. Our closeouts need to be aggressive yet disciplined against him given his ability to drive it.
- **Very capable midrange scorer on average volume** — shots we want but must be contested!
- **Not a passer** but is secure with the ball. SCORER!

DEFENSE

- Steal threat and a capable shot blocker. Active defender.

3&D forward. Above average usage and efficiency. Pure jump shooter, mostly 3's and highly capable! Capable in the midrange but less effective overall. Impact on D!

Updated HDI
Player Rating
76

OFFENSE

- Usage and efficiency are both above average.
- Primarily a jump shooter — HIGH VOLUME 3 Point Shooter - almost 2/3 of his shots are 3's — 33% 3J%

 - Very active in the halfcourt and must find off inbounds plays. Must contest all shots!

- Capable midrange shooter on moderate volume. Struggles late in the shot clock with these shots — good for us!

 - Capable but still mostly inefficient — run him off the line and into these!

- Low-volume rim scorer but is efficient here when given the opportunities.
- Not an eager offensive rebounder.
- Struggling at the FT line.
- Not making a big impact outside of his 3pt shooting — be very aggressive in running him off the line! Make him beat us any other way.

DEFENSE

- Strong shot blocker.
- BYU has been much stronger on the defensive end with him on the court. Potential 3&D?

*ELITE efficiency on average usage. LETHAL 3PT
SPECIALIST!*

Updated HDI
Player Rating
79

OFFENSE

- ELITE efficiency on average usage. His team has been much better offensively with him in the lineup.
- EXTREMELY HIGH VOLUME FROM 3 — close to 80% of his shots are from 3 (3pt specialist).
 - Making 44% of his triples. CLOSE OUT HARD! Nothing can be open.
 - Spot-up shooter who is very active in all phases. Must be there off the catch!
 - Frequent target on BLOB/SLOB plays!
 - Dangerous shooter on second-chance 3's! Stay attached!
- Rarely scores inside the arc.
- Not much of a passer, mostly a shooting threat.

DEFENSE

- Individual defensive metrics do not appear to stand out.

ELITE efficiency on fairly high usage. Does his work inside. Excellent paint scorer, ELITE 2-way rebounder, and strong shot blocker. LIVES on the FT Line. Capable passer

Updated HDI
Player Rating
84

OFFENSE

- ELITE efficiency on fairly high usage. Better on this end with him over Keita.
- Paint scorer. Almost 60% of his shots are layups/dunks.
 - Huge presence at the rim in the halfcourt and is a good finisher, often as a cutter/roller but occasionally off the dribble.
 - Excellent offensive rebounder, outstanding for his size! Excels at converting OR's into putbacks or FT's. Keep him off the glass!
 - LIVES at the FT line due to his interior presence. Very good FT shooter.
- EAGER midrange shooter – extended paint 2s. Normally this would be a red flag, but he's just as effective here as he is around the basket. Must contest!
- Not likely to hurt us outside the paint.
- Productive passer with an average TO rate. Creates for his teammates in the halfcourt and late in the shot clock.

DEFENSE

- Good shot blocker and ELITE defensive rebounder.
- Although, their defense is less effective when he plays – they likely lose some size with him in.

TRANSITION SHOTS

Keba Keita

6'8" 3rd

Traditional forward. Efficient overall on low usage. Catch and finish rim scorer, ELITE of the ELITE 2-way rebounders. Defensive anchor. Poor FT shooter.

Updated HDI
Player Rating
81

OFFENSE

- Efficient overall on low usage. Traditional forward.
- HIGH rim volume. Close to 90% of his shots come at the rim - decent finisher, now shooting 64% on dunks/layups. Looking mostly to score on assists (rim rolls, duck-ins, cuts, etc.).
 - Very rarely shoots away from the rim and has struggled when doing so. No point-blank catches.
- Extremely active on the offensive glass and with offensive putbacks. Must box out and deny him these opportunities!
 - Goes in all situations and on all shot types – relentless. MUST BOX!
- Gets to the FT line at a high rate due to his interior presence. POOR FT shooter.
- Average assist and TO rates overall. Gives it away at a high rate in transition/early clock possessions.

DEFENSE

- Shot blocker - very foul prone. Use shot fakes when he is in the game.
- Also one of the best D-Rebounders in the country.
- Makes a positive impact on team defense and D-Rebounding. They're better on this end with him over Traore.

*Average efficiency on fairly high usage. 3pt threat.
Effective passer in transition. Capable finisher at the
rim.*

Updated HDI
Player Rating
74

OFFENSE

- Average efficiency on fairly high usage.
- Mostly a 3pt shooter. Over 54% of his shots are from 3 – 33% 3J%

 - Capable off the catch and dribble in both halfcourt and transition. Must be ready to contest!
 - BYU will also kick to him after offensive rebounds. Stay attached!

- Capable rim finisher on average volume – capable driver. Closeouts must be aggressive but not out of control.
- Will occasionally pull-up in the midrange too where he's been capable.
- VERY effective passer in transition. TO prone in their halfcourt offense.

DEFENSE

- Individual stats do not stand out.

Low usage and efficiency. Mostly a 3pt shooter but struggling some. Struggling with TO's. Should be a better rebounder on both ends.

Updated HDI
Player Rating
54

OFFENSE

- Low usage, low efficiency.
- More than 60% of his shots are 3's but is struggling this season – 21% 3P%. Pretty aggressive in the halfcourt offense when in the game.
- Rarely scores inside the arc but has been efficient at the rim and from mid-range on low frequency.
- Average offensive rebounder – should be better.
- Not looking to pass. TURNOVER PRONE too! Heat him up.

DEFENSE

- Average shot blocker for his size.
- Average defensive rebounder – should be better.

VERY efficient on average usage. Highly capable rim scorer, offensive rebounder, and 3pt shooter. Active hands on D yet foul prone. Poor D-rebounder.

Updated HDI
Player Rating
74

OFFENSE

- **VERY efficient on average usage.**
- Smart shot selection; mostly 3's and layups.
 - About $\frac{1}{2}$ of his shots are at the rim. Productive rim finisher when he has a good look.
 - Capable 3pt shooter and fairly eager. 6/20 on the year.
- Great O-Rebounder! Aggressive and **VERY effective** on putback shots. **BOX OUT!**
- **Not much of a passer**, score-first.

DEFENSE

- Steal threat who can also block shots. Foul prone as well – aggressive!
- Poor individual defensive rebounder.
- Their defense and rebounding is worse with him on the floor.

Elijah Crawford

6'1" 1st

Negative efficiency on fairly high usage. High risk, high reward passer! Struggling scorer. Steal threat yet foul prone.

Updated HDI
Player Rating
60

OFFENSE

- Negative efficiency on fairly high usage. Data is limited due to his PT — be careful not to overinterpret.
- Productive passer in halfcourt and transition, but turnover prone in transition as well. Disrupt his vision!
- Willing to take shots from all 3-levels but simply hasn't found his touch from anywhere. Make him score!
 - 1/8 from 3.
 - 5/13 on 2s.

DEFENSE

- Big time steal threat, but also highly foul prone. A gambler on defense.
